The master mark

A record held in continuity, with a proof state attached.

The L is the tray. The bar is the record. The dot is the proof. Both rest on the same line, held up by the tray's tail. Every measure is derived from the stroke S.

Grid	120 × 120 units · 8 margin · live 104
Stroke S	28 — stem and foot
Record bar	14 × 32 (S/2 wide) · r 4
Proof dot	⌀ 20 · centre 80, 62
Rhythm	stem · 10 · bar · 10 · dot
Rest line	y 72 — bar and dot end together, 12 above the foot
Tail	runs the last S of the foot, rises S/2
Corners	outer 24 / 20 · stem cap 10 · fillet 8 · tail cap 6

02 · WORDMARK LOCKUP

The mark spans ascender to descender

Letters	Monoline, built from circles and stems — constructed, not typeset
Stroke	`10 on x-height 48`
Bowls	`r 20 centreline · overshoot 1`
Tittle	The proof dot again: ø 14, teal. The only colored part of the word.
Mark size	Ascender top to descender bottom
Gap · clear	1 S (the mark's own stroke, at lockup scale)
Minimum	Lockup 112 px wide. Below that, the mark alone.
Status	Geometry v1.0 · optical pass pending

Teal is a state, not a fill

Teal marks the proof dot, the tittle and status accents. It is never text and never the L. Each ground gets its own teal.

04 · SMALL SIZES

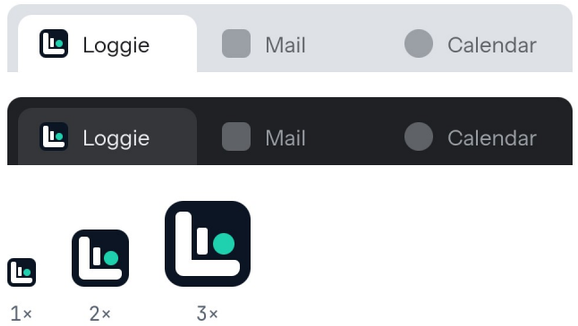

16 px: two candidates, keep the bar in both

Drawn on the pixel grid, not scaled down. Tabs here render at 16 CSS px, which is 32 device px on a 2× screen. Judge the 16×16 PNG on a 1× display.

A · L + short bar + enlarged dot

Bar 2 × 5, dot ⌀ 4, 1 px gaps. No tail. Keeps the teal, so it stays recognizable in a row of tabs.

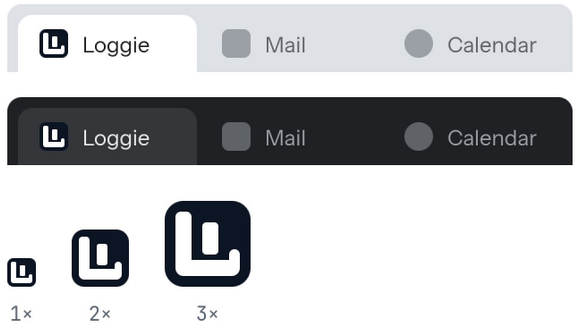

B · L + bar, no dot

Bar 3 × 6, 2 px gap from the stem. Keeps a 2 px tail so the tray still reads. Single color.

32 px and up: the master mark in a tile

DECISION

[A or B — choose in a real tab on a 1× screen]

The winner becomes favicon.svg and favicon-16x16.png. 32 px and up always use the master.

Tile composition

Mark at 0.66 of the tile (104 → 68.6 of 120).

Optical nudge: +2 right, −2 up, because the L's weight sits low-left.

Dashed: 80% maskable safe circle.
